

MURRAY CORPORATION Capabilities

Stamped Parts

Murray can manufacture stamped metal parts in most grades of steel, as well as in aluminum and copper.

We have stamping tool design / build capabilities, and production facilities in the US, China, and Canada.

We can also use your existing die sets.

Hose Clamps

We offer a full range of hose clamps manufactured in the US, Canada and China.

We are always looking for new product opportunities. Bring us your problem and we will help you find a solution.

We can make custom clamps specific for your application.

ISO 9001:2008 certified.

Experienced in working with large and small OEM manufacturers, as well as all levels of distribution on a global basis.

Murray offers JIT delivery or we can build and carry inventory for you with blanket orders.

Special packaging capabilities available to customize with your logo.

Atlantis Industries (sister company)

Plastic Injection Molded Parts

Manufacturer of custom plastic injection molded parts.

Work with all resin grades including commodity grades, engineering grades and custom blends.
