Murray Tools Tri Gage

TOOLS

Measures Bolts & Threads Accurately to Save Time!

This time saving tool measures the bolt diameter and thread pitch for accurate replacement of bolts. Murray Tools' Bolt Sizer Thread Pitch Gage is military grade, with machine stamped markings for durability.

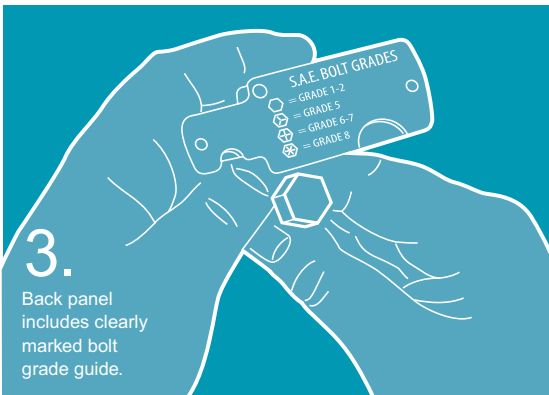

1.

Identify thread pitch with a full set of common pitch gages.

2.

Determine bolt size in either Metric or American Standard.

3.

Back panel includes clearly marked bolt grade guide.

Fast & Easy

Quickly identifies the correct bolt needed to get the job done right

- High-grade stainless steel, so it's rust free.
- Tension wheels are ribbed, for a non-slip grip.
- Finger notches are easy to use, for a better grip.
- Pre-drilled to put on your tool belt.
- Rounded edges to prevent injury.
- Bolt sizing blades are marked with bolt diameter and wrench size.

Ideal for machinists, engineers, mechanics, and do-it-yourselfers.
